KYC Assurance Platform - Introduction

KYC Assurance Platform is an AI-enabled audit and quality assurance platform designed to automate the review of KYC records, identify compliance gaps, and provide risk-based audit scoring. The solution leverages rule engines and AI-driven validations to replicate and enhance manual audit processes, enabling faster, consistent, and regulator-ready KYC assessments.

Key features includes:

01 Automated KYC Review:

- Validates completeness, accuracy, and consistency of KYC data
- Detects missing fields, document gaps, and inconsistencies

02 AI-Powered Assessment:

- NLP-based review of KYC write-ups and justifications
- Intelligent identification of weak or generic documentation

03 Rule-Based Audit Engine:

- Configurable rules aligned to policy & regulatory requirements
- Covers ID&V, screening, questionnaires, and policy adherence

04 Risk-Based Audit Scoring:

- Automated scoring of KYC records (Low / Medium / High risk)
- Prioritizes high-risk cases for review

05 Workflow & Case Management:

- End-to-end audit lifecycle tracking
- Role-based assignment, escalation, and closure

06 Dashboards & Reporting:

- Real-time visibility into audit outcomes
- Trend analysis and regulator-ready reports

07 Spreadsheet-Based Deployment:

- Easy-to-deploy using structured templates
- No dependency on core system integration

KYC Assurance Platform – Key Components

Architecture Overview

Data Input → Rules Engine → Scoring → Workflow → Dashboard & Reporting

Data Input Layer

- Standardized Excel templates (KYC, ID&V, Screening, Questionnaire, Risk Inputs)
- Upload interface with validations (format, mandatory fields, consistency)
- Output: Clean, audit-ready dataset

Rules Engine (Automation Core)

- Configurable rule library (completeness, accuracy, compliance, consistency)
- Detects: Missing KYC data, Screening gaps, Policy deviations, Data inconsistencies
- Output: Rule flags (Pass / Fail / Warning)

- Rule-driven audit score (0-100)
- Severity-based scoring (High / Medium / Low)
- Risk Classification: Low | Medium | High
- Optional: Customer risk-weighted scoring & trend analysis

- Lifecycle: Upload → Validate → Flag → Assign → Review → Close
- Role-based: Analyst | Reviewer | Compliance
- Auto case creation, SLA tracking & escalation

- Executive View: Audit coverage, high-risk cases, key issues
- Operational View: Rule trends, BU/geography insights
- Drill-down to customer & rule-level details
- Outputs: Audit reports, exception logs, trend analysis

Risk-Based Scoring Engine

Workflow Engine (Case Management)

Dashboard & Reporting

KYC Assurance Platform – Rule Framework

Rule ID	Process Step	Rule Description	Logic / Condition	Output / Flag	Severity
KYC_01	KYC Form Review	Check completeness of KYC form fields	Mandatory fields (Name, DOB, PAN, Address, Risk Category) are null/blank	Incomplete KYC	High
KYC_02	KYC Form Review	Validate quality of write-up	Text length < threshold OR generic keywords (e.g., "NA", "Same")	Poor Documentation	Medium
KYC_03	ID&V	Verify presence of ID documents	Missing PAN/Aadhaar/Passport	Missing ID Proof	High
KYC_04	ID&V	Validate document authenticity	Expiry date < current date OR invalid format	Invalid Document	High
KYC_05	ID&V	Cross-check name consistency	Name mismatch across KYC form vs ID documents	Data Mismatch	High
KYC_06	Screening	Ensure screening performed	Screening status = Null / Not Performed	Screening Missing	High
KYC_07	Screening	Validate screening result assessment	Alerts present but no disposition/comment	Unassessed Alert	High
KYC_08	Screening	Check documentation quality	Missing justification for cleared alerts	Weak Justification	Medium
KYC_09	Customer Info	Validate key attributes completeness	Missing industry / source of wealth / business activity	Incomplete Profile	Medium
KYC_10	Customer Info	Check counterparty disclosure	Top counterparties field blank for high-risk clients	Missing Counterparty Info	Medium
KYC_11	Questionnaire	Validate required questionnaires	Mandatory questionnaire not submitted	Missing Questionnaire	High
KYC_12	Questionnaire	Check questionnaire accuracy	Contradictions across responses (e.g., income vs profile)	Inconsistent Responses	Medium
KYC_13	Policy Adherence	Check policy compliance	Deviations from P&P without approval flag	Policy Breach	High
KYC_14	Policy Adherence	Exception handling validation	Exception flag = Yes but approval missing	Unauthorized Exception	High
KYC_15	Risk Rating	Validate risk score computation	Risk score not aligned with rules engine output	Incorrect Risk Rating	High
KYC_16	Risk Rating	Check data capture into scoring model	Missing inputs in risk model fields	Incomplete Risk Input	High
KYC_17	Data Integrity	Cross-field validation	Income < transaction volume OR illogical combinations	Data Anomaly	Medium
KYC_18	Data Integrity	Duplicate detection	Same PAN/Aadhaar across multiple customers	Duplicate Customer	High
KYC_19	Audit Trail	Check documentation completeness	Missing audit trail / timestamps	Audit Gap	Medium
KYC_20	Reporting	Identify gaps for remediation	Any High severity flags present	Escalation Required	High

Our Other Select AI Solutions

01

Generative AI Chatbots

AI assistants that handle customer and internal queries in natural language.

Example: 24x7 support for loan or credit-card customers.

02

Video Analytics

Analyzing video streams for security, compliance or training.

Example: Detecting suspicious behaviour in video KYCs, branch, data center, cash vaults through CCTV footage.

03

Contract Review & Action Agents

Reading and extracting key terms, obligations and risks from documents.

Example: Parsing vendor or borrower agreements for regulatory clauses.

04

Fraud Triage Agent

AI agents that review alerts, and decides if cases needs to be further investigated or closed.

Example: Contacting a customer to determine the nature of a suspected fraud.

05

Code-to-Business Translation & Optimization

Converting complex technical code into plain business language (and vice-versa).

Example: Enabling business users to query databases without writing SQL.

06

Voice AI Agents

Conversational AI handling inbound or outbound calls in multiple languages.

Example: Automated collections or KYC verification calls.

07

Multi-Flow Reconciliation Agent

Automating reconciliation of transactions across multiple systems.

Example: Matching payments and settlements across core banking, treasury and custodial systems.

08

Online Sentiment Analysis

Monitoring social media and forums to gauge public perception or risk.

Example: Tracking brand sentiment after a product launch or service disruption.

09

Image Analytics

Image OCR, validation with government sources, and detection of forgery or tampering.

Example: Performing KYC by comparing images from multiple sources.

10

Predictive Modelling

Forecasting outcomes to improve risk and revenue decisions.

Example: Predicting loan defaults or customer churn.

11

Transaction Monitoring Agent

AI agent that screens, scores and investigates transactions in real time to detect suspicious activity.

Example: Flagging and auto-escalating high-risk cross-border payments for AML review.

12

Reporting Automation & Advanced Analytics

Generating dashboards, regulatory filings and deep insights with minimal manual effort.

Example: Automated generation of RBI, SEBI and IRDA compliance reports and executive dashboards.
